DETAILED ACTION

1. The cancellation of claims 74-75, 78-79, 88, 92-93, 95-97 and the addition of claim 99 is acknowledged and has been entered into the record.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121. The inventions are distinct, each from the other because of the following reasons:

- I. Claims 72-73, 77, 80-85, 87, 89-91, 98-99, drawn to a method of staining a biological specimen, classified in class 435, subclass 40.5.
- II. Claims 76, 86 and 94, drawn to a method of staining a biological specimen, classified in class 436, subclass 180.

3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions they are not disclosed as capable of use together and they have different modes of operation. The method of Group I now disclose dispensing a reagent onto *either* the support medium *or* the evaporation inhibiting liquid phase, then sending at least one stream of air to the surface of the evaporation-inhibiting liquid phase. Group I does *not* require the reagent to be in contact or pass through the evaporation-inhibiting liquid phase. The claims of Group II are drawn to a method which requires; contacting the biological sample with a first solution, then applying a second solution to cover the first solution, stirring the second solution such that motion is transferred into the first solution and applying a reagent, wherein the application of the second solution includes applying the second solution to an impact zone. The impact zone being

Art Unit: 1743

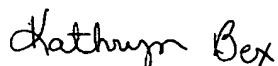

between the biological sample and the end of the support medium, and the step of applying reagent includes applying a reagent to an area between the impact zone and the edge of the biological sample, such that the reagent passes through the second solution.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to P. Kathryn Bex whose telephone number is (703) 306-5697. The examiner can normally be reached on Mondays-Thursdays, alternate Fridays from 6:00 am to 3:30 pm EST.
